## Technical Information

# Depth Filtration BECO PROTECT® XS Range

## **Depth Filter Cartridges**

BECO PROTECT XS from Eaton's Begerow Product Line is a depth filter cartridge for liquid filtration with flow from the inside out. This innovation minimizes product loss during type changeover and at the end of production.

The input and output lines of the housing base are turned 180°, so that the housing volume becomes the filtrate chamber. This allows complete and easy draining of the housing.

BECO PROTECT XS depth filter cartridges are used in a variety of applications in the beverage and food industries.

They are particularly suitable for very small quantities and high-quality products.

## **Characteristics and Advantages**

The specific advantages of BECO PROTECT XS depth filter cartridges:

- Minimum product loss when draining of the housing
- Approx. 30% longer filter service life through greater fine fleece area
- Improved product filterability
- Ideal for suspended installation because no residue filter is required
- Faster flushing uses up to 30% less rinsing water
- High chemical resistance by using 100% polypropylene

## Configuration of the Depth Filter Cartridge

BECO PROTECT XS depth filter cartridges are made from high-quality, wrapped polypropylene layers. The filter material has a broad chemical compatibility. The cage and core of polypropylene ensures maximum mechanical stability. All materials used ensure product-neutral filtration without adsorption or particle migration. The BECO PROTECT XS depth filter cartridges therefore meet the requirements of the customer in terms of safe, gentle filtration of his products.

## Materials used:

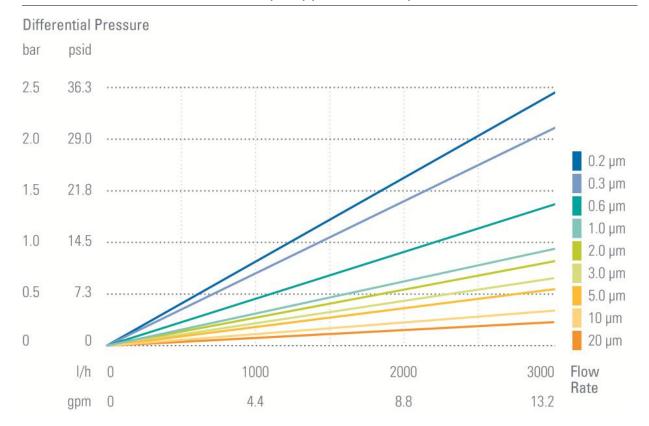

Filter material:	Polypropylene	
Cage, Core	Polypropylene	
End cap/adapter:	Polypropylene, adapter with reinforcing ring	
O-rings:	Silicone (standard)	

The plastic components meet the requirements of Directive 2002/72/EC and amendments. All materials used meet the FDA requirements according to 21 CFR § 177.1520.

## Flow Rate: 10" Element with Water at 68 °F (20 °C) (Standard Values)

## Filter Cartridges Types/Retention Ratings

High retention ratings for a reliable separation effect, & ratio  $\geq 5000$  or  $\geq 99.98\%$  efficiency for defined particles

Туре	Retention rating	
	μm	
XS002	0.2 μm	
XS003	0.3 μm	
XS006	0.6 μm	
XS010	1.0 μm
